KAISTEEL
MOVABLE OUTDOOR SOCIAL KITCHEN

Company and Manufacturing Overview

The Movable Outdoor Social Kitchen

Cook - Gather - Entertain

KS-CM-PUBLIC-20261021 | Public reference | Reviewed 21 October 2026

A clear contracting party

KAISTEEL LIMITED is the Hong Kong commercial and contracting entity responsible for quotations, orders, delivery coordination, warranty and after-sales support as agreed in the customer contract. BRN: 78595271. Business address: Room 602, 6/F, Kai Yue Commercial Building, No. 2C Argyle Street, Mongkok, Kowloon, Hong Kong.

Independent operating relationships

Production is carried out by an independent manufacturing partner in Guangdong. Guangdong Dingzhi Decoration Design Co., Ltd. provides technical and operational support. These businesses are separate legal entities and are not presented as a parent-subsidiary group or one manufacturing entity.

Founder background

Guirong Peng began architectural decoration design and related engineering work in 2001. He established the Hemei building-materials business in 2008; Dingzhi was established in 2017. These personal career and business milestones are distinct from KAISTEEL LIMITED corporate history.

Verification before commitment

Business-registration and name-change records are available for qualified verification. KAISTEEL LIMITED was formerly GRACE JEWELRY TECH LIMITED; the name changed on 17 August 2026 while the legal entity remained the same. The current BR period does not establish the original incorporation date.

Manufacturing due diligence

Factory identity, registration details and relevant credentials can be shared under a mutual confidentiality and non-circumvention agreement with no purchase commitment. Live factory video reviews or independent third-party inspections can be arranged. No factory ownership, blanket certification or completed delivery case is implied by this summary.

Order-linked production controls

Approve the configuration, drawings, BOM, appliance interfaces, materials and acceptance criteria before production. Match inspection, material and packing records to the actual order; hold non-conformities for corrective action and reinspection. Final loading requires measured packing data and an approved Packing Plan.

Component evidence and local responsibilities

Appliance and component documents must match the exact model, ratings and destination. A component certificate does not certify the complete kitchen. Establish required evidence and feasibility before making commitments; complete the agreed order dossier before release. Import, local permits and licensed utility connections follow the agreed responsibilities.
